Vehicle cleaning tips for drivers

COMMERCIAL
PASSENGER
VEHICLES
VICTORIA

What should I clean?

You must clean any 'high touch' surfaces – those that drivers and/or passengers touch regularly. These include:

Steering wheel and controls

Keys

Door handles (including boot)

Window controls

Rear view mirror adjuster

Payment terminals

Handbrake

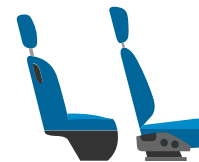

Gearstick

Visors

Internal grab handles

Seats

Seatbelts and clips

When should I clean my vehicle?

- Clean high touch surfaces touched by passengers after each passenger leaves and before the next trip starts.
- Clean high touch surfaces only touched by the driver at the end of each driver's shift.

What cleaning products should I use?

Use products containing bleach, alcohol or hydrogen peroxide. If these are not available, use a disinfectant.

Play your part in reducing the spread of Coronavirus (COVID-19) by keeping your vehicle clean.
